OUTSIDE VIEW

„Simplicity is the keynote to all true elegance.“

The ground floor front elevation is clad in an Alucobond finish giving it an elegant finish. Our main façade will be rendered using an organic plaster with a coloured “silicata” texture. Of course external walls and roofs are going to be insulated to EPC requirements. Parapet walls include a sill finished in 20mm thick hard-stone cladding on the horizontal surface and external metalwork has been specially designed for the project using traditional wrought ironwork skills, with a modern look in a contemporary interpretation.

RECEPTION

„Architecture is just art we live and work in.“

The main entrance door is made of tempered glass and stainless steel handles. A connection to audio-visual intercom in each office is possible.

Both the entrance hall and lobby area will have floors as well as walls of marble. Stairs are clad in marble or similar synthetic material in a contemporary interpretation. There will be two MRL Traction 8 passenger Lifts available, equipped with auto level to stop in case of power failure. The offices' main entrance doors are made in a solid wood walnut finish, complete with box frame and architraves, produced in horizontal panels, with stainless steel door handles and hinges, three point door lock. Soffits in common areas in seamless gypsum soffit with recessed lighting.

OFFICE SPACES

„Believe in what you work for.“

All office areas will be finished in Gres porcelain tile in a 60cm by 60cm format laid in a regular pattern, with grouted joints, with color ranges in natural stone color bases with different scales of color and texture.
